services
Ground cables

Harnesses
Connection

Since 2000, OTN provides its services to the railway sector, specializing on bogie maintenance and supply of spare and replacement parts for bogie systems.

In our new 3000 m² production facility located in Le Creusot - France - our services include wiring of electrical enclosures and the manufacturing of harnesses, connection and ground cables for new projects or maintenance programs and renovation.

We also provide services on site, in France and abroad, for new projects and maintenance programs.

Our network of suppliers, specialized in railway applications allows us to meet the most demanding specifications by providing advanced technical solutions.
