

Mechanics *Flexibility* Energy **Industrial maintenance**

For over 25 years, and as a natural extension to its nuclear maintenance activity, OTN offers a wide range of maintenance and industrial services.

In addition to traditional electrical installations and maintenance projects, our offer covers the technical study, realization and control of electrical cabinets in our productions sites through the installation and connection at the client site.

The diversity of skills offered by our maintenance team, combined with the expertise of our production technicians - wiremen, fitters and controllers - allow us to reach the desired versatility to perform the following tasks:

- Energy cell installation
- Reorganisation of production line
- Wiring and connection of electrical cabinets
- Mechanical and electrical maintenance
- Electrical testing and control

Concerned about the quality of work and the safety of our teams, our staff is :

- LV / HV Certified (C18510)
- CACES
- Rolling Cranes
- Safety trained and First Aid

... and evolves according to diverse demands of our customers.

Industrial maintenance, that's our job!
